SKYSHADES PARKING STRUCTURES

Available in these designs
or your custom designed &
engineered structure.

"SKYShades Shade Sails are an important protection layer against the damaging UV Rays which are known to cause skin cancer.

Now we've given you an added benefit to help the planet by adding renewable solar energy to our already fantastic shade structures.

Offer your clients covered parking, protect their cars from damaging sun & weather elements be green and energy wise, and make your property look great, all with an installation of SKYShades SOLAR Parking Structures!

Great job, mates!"

Barry Maranta

SKYSHADES PRESIDENT / CEO
& AUSTRALIAN BUSINESSMAN

Ask about our unique lease back programs.
Your shade structure may be yours in just 5 years!

SKYSHADES SOLAR PARKING STRUCTURES

We incorporate thin film photovoltaic solar panels[®] into our award-winning shade products using our patented process.

Generate power day & night with solar photovoltaics. No direct sun necessary.

Charge electric cars, run underlighting, all without a dime in energy costs.

Under Cover Parking carries a premium price for tenants and is a major plus for shopping centers.

L.E.E.D.s points available
State & Federal Incentives
may be available in your location.

NO CAPITAL EXPENDITURE REQUIRED!!!
Ask us about our simple affordable lease-back plan with
no up-front capital expenditure.
You can own the structures after 5 years.

Why SKYShades SOLAR?

Covered parking lots can reduce localized warming, which is a known ingredient for smog in urban areas

Solar electric generating shade structures can assist LEED project teams with points toward certification in the following categories:

- o Alternative Fuel Vehicles and Refueling Stations
- o Stormwater Control
- o Optimized Energy Performance
- o On-Site Renewable Energy Generation
- o Water Efficiency
- o Material Reuse & Recycled Materials

THE BENEFITS

- ♻️ SKYShades Solar installations can assist with LEED points to help qualify towards a Silver Star Rating
- ♻️ SKYShades materials can be made with recycled materials
- ♻️ SKYShades structures can be integrated into stormwater collection systems for rainwater harvesting and grey water irrigation systems
- ♻️ SKYShades are durable and may be reused after the useful life span of a building's original use
- ♻️ SKYShades solar products can help companies offset CO2 emissions and contribute green energy to the electric grid
- ♻️ SKYShades installations help to stop the heat island effect
